Purpose of Contact Closure of Sanitary Sewer at B991 and T883

Discussion

B991

As discussed and agreed, a sample is to be collected for radiological and metals analyses from the sanitary sewer line immediately east of B991 as the two manholes present east of the building are removed. These lines and manholes were previously flushed.

After sample collection, a grout plug approximately 12 inches thick is to be placed into the open end of the sanitary sewer line and the area will be backfilled.

T883 Area

The inlet and outlet to the manhole located due west of the 883 trailers is to be plugged and grouted. No additional work will occur at this time.
